OCTOBER 2024

PROJECT MEETING

The third transnational meeting, and the last one, took place in Maribor, Slovenia on 15.10.2024. Representatives from all partner organisations were present. The meeting was very successful and we effectively covered all the necessary topics. We focused on project management, updated the action plan and upcoming deadlines.

As the project is coming to an end this year, we reviewed what still needs to be done for a successful finalization of the project. We discussed about the implementation of the co-creation workshops, which will be held from the first to the 15th of november. Participants will get to know the platform and the educational game that we have developed in the framework of the project. This activity will be followed by the piloting of the results of the project to get confirmation from the stakeholders that our project results are of high quality and useful.

We have also reviewed the educational toolkit and policy recommendation policy and scheduled for later in October. Dissemination activities, including multiplier events, social media campaigns and press releases were mentioned as key to the visibility of the project.

PROJECT RESULTS

- WP1-Project Management
- WP2-Research and Production of Educational Materials
- WP3-COM Gamified Digital Environment
- WP4-Educational Toolkit & Policy recommendation paper
- WP5- Raising Awareness Campaigns

WHAT TO EXPECT NOW?

Online co-creation workshops are starting in November. Participants will have the opportunity to explore a new digital environment designed in the form of a game that combines learning and fun activities. A pilot test will also allow feedback to help improve the experience.

In addition, multiplier events will be organised towards the end of the project. These events will be a great opportunity to get additional information about the project and its results, as well as to network with other stakeholders. At the events we will present the results of the project and invite participants to discuss and participate in the further development of ideas and solutions. More information on the dates and venues of the events will be available in the coming period.
